

IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~striketrough~~.

Please AMEND the paragraph beginning at page 22, line 3, as follows:

The power save information 172 includes a flag 173, information to designate the devices 174 and the power save control information 175. If the flag 173 is off, the power save control is executed for the devices which are designated by the information to designate the devices 174 according to the power save control information 175. On the other hand, if the flag 173 is on, the power save control is executed for other devices which are not designated by the information to designate the devices 174 according to the power save control information 175. Thus, the information to designate the devices 174 designates the devices to execute the power save control according to the power save control information 175 when the flag 173 is off. The power save control information 175 shows the kinds of the power save control operation which are to be executed, ~~the kinds includes~~ such as the power on/off control, or the suspend/resume control.
